

IN THE ABSTRACT OF THE DISCLOSURE:

~~The present invention provides an ultraviolet curing resin composition for paints, inks, adhesives, sealing agents and primers, which has good adhesion to polyolefins, contains no organic solvent and provides high working efficiency.~~

~~—The present invention provides an~~ An ultraviolet-curing resin composition ~~comprising of~~ (a) 5 to 35 parts by mass of a chlorinated polyolefin with a chlorine content of 15 to 40 mass %, (b) 15 to 60 parts by mass of an alicyclic hydrocarbon mono(meth)acrylate, and (c) 5 to 80 parts by mass of a polypropylene glycol di(meth)acrylate; and ~~further containing~~, per 100 parts by mass of the total amount of components (a), (b) and (c), (d) 0 to 1100 parts by mass of an aliphatic hydrocarbon di(meth)acrylate and (e) 0 to 600 parts by mass of a polyfunctional monomer having 3 to 6 (meth)acryloyl groups in its molecule; and ~~further containing~~, per 100 parts by mass of the total amount of components (b), (c), (d) and (e), (f) 1 to 15 parts by mass of a photoinitiator; and

~~paints, inks, adhesives, sealing agents and primers comprising~~ the composition as an active ingredient in paints, inks, adhesives, sealing agents and primers.
